SUMMARY

Enthusiastic and detail-oriented Intern with a strong foundation in web technologies and problem-solving. Proficient in programming languages such as Java, C, and JavaScript, with hands-on experience in web development frameworks and database management. Adept at designing and implementing solutions that optimize performance and enhance user experience. Demonstrated ability to work collaboratively in fast-paced environments and contribute to project success through effective communication and analytical skills.

EXPERIENCE

Web Development Intern

Cognifyz Technologies

April 2024 - May 2024, Hyderabad

- During my internship period at Cognifyz Technologies, I was responsible for the conception, implementation, and management of web applications.
- Some of my activities involved working with seniors to develop effective inputs and proper response to clients' interfaces as well as contributing to adding new features, improving website effectiveness.
- Able to work directly with the front end development languages such as HTML, CSS, JavaScript and Bootstrap Framework and develop various websites.

PROJECTS

My Portfolio Website

Front-End • July 2024 -August 2024

- Designed and Developed a personal Portfolio website to showcase my skills, projects, and professional experiences.
- **Tools & Technologies:** HTML, CSS , JavaScript.

Responsive Weather Application

Front-End • github.com/adithyasurada/Weather_App • July 2024 -August 2024

- Designed and Developed a user-friendly interface that adapts seamlessly to different devices and screen sizes.
- optimized performance for fast load times and smooth operation across various devices and network conditions, while also ensuring the application met web accessibility standards.
- **Tools & Technologies:** HTML, CSS, Javascript, Bootstrap

Quizzard-A Quiz Game!

Java • github.com/adithyasurada/QUIZ_APP • March 2024 - April 2024

- In the Quizzard project I've built an application of an interactive quiz from the start.
- Implemented both the graphical user interface and the server-side interface while managing users' scores and quiz questions.
- Can also create various questions under various categories and also generates the score of the player.
- **Tools & Technologies:** Java , JDBC , MySQL.
-
